

# Mr. Elmer

## Sustainable-Innovation-Workshop

Mr. Elmer is pleased to invite you to our 2<sup>nd</sup> Annual Sustainable Innovation Workshop.

**Purpose:** Mr. Elmer will host a customized workshop focused on systems design and process building in the area of MTSS/PBIS and other critical educational processes as defined by Newport Mesa Unified School District leadership. You will walk away with systemic solutions that have been designed by your collective voices. These solutions will simplify the way your staff works, standardize your practices and be sustained by resource and software automation.

**When:** August 4-7

**Where:** Santa Barbra, California

**Who:**

- NMUSD educational leadership
- Mr. Elmer leadership team, your technology partners
- Burrus Associates process consultants

**Details:** Mr. Elmer recognizes the importance of clearly mapping and articulating the objectives of NMUSD educational practice prior to digital automation with software. Therefore, Mr. Elmer is partnering with process consulting firm Burrus Associates to provide a “best in class” process simulation known as Shrink Wrap Homes. This highly interactive, team based simulation will educate NMUSD staff in process design thinking tools and activities. Upon the completion of the simulation, Burrus consultants will immediately move into live activities that use the newly acquired skills to work on NMUSD specific processes. Process consultants will facilitate this effort and Mr. Elmer team will support the standardization and digitization of future state workflow.

This Professional Learning opportunity in conjunction with Mr. Elmer and Burrus Associates represents a unique opportunity to align internal resources with a team of outside process and technology advisors to create a set of actionable solutions designed and built specifically for NMUSD.

**Cost:** \$12,500

Thank you for your time and consideration in these matters. Please feel free to contact me with any questions or comments:
